(54) Title: **A TERMINAL CONNECTION FOR A SUPERCONDUCTIVE CABLE**

(57) Abstract: A terminal connection of a superconductive cable comprising a thermally insulating high-voltage cable through whose interior liquid nitrogen flows. The superconductive cable comprises a plurality of superconductive tapes which are in connection with a copper block (20), which is likewise cooled by means of the liquid nitrogen, and is in connection via flexible electrical conductors (25) with a top bolt (28) which may be connected to electrical equipment at room temperature. Via a T member, the liquid nitrogen is in connection with a cooling machine which is electrically insulated from the remaining part of the terminal connection.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/DK 01/00639

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: H01R 4/68, H01B 12/16

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: H01R, H01B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
